

# VOTE LYDIA FOR ETHICAL AND ENVIRONMENTAL OFFICER

I am a first year Zoology PhD student, researching how agricultural policy could better encourage environmental conservation alongside food production. I've been part of the Green Impact Team this year, organising the pot plant sale and film screening during Green Week. I have previous experience on College committees having been in charge of food on the Jesus May Ball Committee 2016.

## IF ELECTED, I PLAN TO:

- Campaign for the 16.5% of Hughes Hall's staff that do not currently receive the Real Living Wage (as of August 2018) to be paid at least the recommended £8.75 an hour.
- Improve the nutritional quality of vegetarian and vegan options in hall.
- Advocate for long-term sustainability to be the focus of College's financial investments.
- Continue to review and improve College's environmental practices through the Green Impact Scheme.
- Run more great events to encourage discussion around important issues such as food security, climate change and climate justice.
- Provide fun and informative events (with prizes!) to teach you all what can and cannot be recycled and composted.
- And of course look forward to the return of the famous plant sale!
